The screenshot shows the Grav Admin User registration interface. The title bar reads "Grav Register Admin User | Grav — Mozilla Firefox". The main content area has a dark background with the word "GRAV" in large white letters. A message at the top states: "The Admin plugin has been installed, but no admin accounts could be found. Please create an admin account to ensure your Grav install is secure...". Below this is a form with the following fields:

Username *	Email *
ars-vel	arseniivelichko2@gmail.com
Password *	Confirm Password *
*****	*****
Full name	Title
Arseniy	Administrator

At the bottom of the form are two buttons: "Clear Form" and "Create User".

This screenshot is identical to the one above, but it shows the "Create User" button has been clicked, and the page now displays a success message: "User successfully created! You can now log in with the credentials you provided." The rest of the interface remains the same.

This screenshot is identical to the previous ones, showing the successful creation of the user "ars-vel".

The screenshot shows the Grav CMS dashboard interface. On the left is a sidebar with user information (Arseniy Administrator) and navigation links: Dashboard, Configuration, Accounts (1), Pages (2), Plugins (8), Themes (1), Tools, and Logout. The main content area has a purple header bar with a message about a Grav v1.7.44 update and a success message about logging in. Below this is a dark banner for 'Image Optimize'. The dashboard is divided into several sections: 'Maintenance' (10% updated, Updates Available, Backup Now, Update), 'Page View Statistics' (0 Today, 0 Week, 0 Month), 'Notifications' (INFO: Optimize your Grav site with Image Optimize; NOTE: Please Cast your vote for Grav in the 2024 CMS Critic Awards; and a link to Grav Premium Plugins and Themes available), and a 'News Feed' section showing recent posts from macOS 14.0 Sonoma Apache Setup.
